Site adjustment in a semi-synthetic sequential causal benchmark

Real clinical video; synthetic actions, outcomes and truth

Confirmatory

K | P > 0

Actions after the window
With site: |bias| lower
P1b-SITE mean D 2.198

K

One step, no later actions
With site: |bias| higher
P2-SITE mean D 0.052

Linear site erasure

Full 278-case set
passes
